

(Senior) Android Developer (m/f)

Maybe you're familiar with the situation: you're trying to work out more often, eat less sugar or get to bed earlier, but things aren't really getting off the ground the way they should. Many people do not reach their goals, and it's not because of a lack of determination. It's the many traps and excuses – big and small, tempting and trivial – we face every day. At vitaliberty, the task we have set ourselves is to help support millions of people establish healthier habits.

FiTS is a new adaptive motivation program that has been available for Android and iOS since early 2018. With the help of big data, motivational-psychology methods, and a healthy sense of humor, FiTS makes it easy (or at least easier) for normal people to stick to their good resolutions and not get discouraged. Over 150,000 people are already on board. Our goal is to become one of the leading global platforms for personal behavior modification within the next three years. And that's why we need you!

We want to add an experienced (senior) Android Developer to our product experience team in Mannheim.

You are a good match for us if you have:

- Completed a university degree in IT, a comparable field in engineering or the sciences with an IT focus or have a comparable amount of professional experience.
- Excellent skills in spoken and written German and English.
- Relevant project experience in developing native Android apps.
- Solid knowledge of the native Android video player.
- Experience in linking HTTP/JSON and REST interfaces
Experience in front-end development frameworks (jQuery, AngularJS).
- Experience with agile development principles (scrum).

Your tasks include the following:

- Optimizing the Android app FiTS (<https://joinfits.com>) on an ongoing basis.
- Developing prototypes for product complements and new product lines.
- Troubleshooting.
- Working on a close interdisciplinary basis with design / concept / user experience / project management and backend.
- Contributing to specifications.
- Conducting tests and product inspections.
- Helping select technologies.
- It would also be good if you have experience with Requirements management system tools (Confluence, JIRA) native iOS development / SWIFT.

Apply now at jobs@vitaliberty.de and show us that we need you!
